ABOUT US

Ergon Technologies (ET) is a global engineering company delivering end-to-end lifecycle management solutions for the oil & gas industry.

Founded in 2015 in Dubai, ET operates across the UAE, KSA, India and international markets, serving offshore and onshore assets with unmatched reliability and technical expertise.

Quality Policy

We are committed to delivering world-class oilfield equipment, spare parts, maintenance, inspection, and project management services, while ensuring:

- Environmental protection
 - Health & safety for all personnel
 - Responsible, compliant, and high-quality operations
-

Our Core Values

- Safety First – for people and the environment
- Trust & Respect – in every partnership
- Accountability – in every action and commitment

» OUR MISSION

To deliver world-class lifecycle management, inspection, repair, and engineering services to the energy industry ensuring safety, operational integrity, and long-term value for our clients through innovation, expertise, and responsible practices.

» OUR VALUES

- Safety first always for personnel and the environment we operate in.
- Trust and Respect to all stakeholders with service quality as our touchstone.
- Be accountable for our actions and commitments.

OUR SERVICES

We offer a full suite of inspection, repair, and overhaul services across multiple systems, backed by extensive experience and a proven track record. Our highly trained service engineers and technicians bring years of hands-on expertise, enabling them to execute even the most complex tasks with confidence and precision.

SERVICES BACKED BY API Q1, Q2, 18LCM, 7K

1. Inspection and Repair

- Jacking system
- Skidding system
- Drilling system
- Crane system

2. Safety Services

- Rope Access
- DROPS

3. NDT Services

4. Manufacturing

SERVICES BACKED BY 4F

1. Fabrication

JACKING SYSTEM

We have experience working on all types of jacking systems in the jack-up fleet. Our technicians, with over 50 years of combined experience, handle inspection, repair, and overhaul of jacking systems.

We carry out detailed inspections to assess system condition, recommend required parts, and complete remediation to restore performance.

We also provide periodic inspections of gears and pinions to ensure safe, efficient operation and compliance with offshore and class requirements.

SKIDDING SYSTEM

Be it electrical rack and pinion skidding system or hydraulic skidding system, we can carry out complete inspection and overhaul.

We also have excellent experience in inspection repair and maintenance of anchor winches and fixation system.

DRILLING SYSTEM

With service engineers having decades of OEM experience, we can carry out CAT 3/ CAT 4 inspection, complete overhaul and trouble shooting as per various API practices.

Our workshop is fully equipped to carry out complete overhaul of various equipment of best quality and price.

Ergon is certified in API 7K for manufacturing of drilling and well servicing equipment.

A large red and yellow crane is the central focus of the image, extending from the bottom right towards the top left. The crane's lattice structure is clearly visible. In the background, another smaller red crane is partially visible on the left, and the top of an industrial structure with several vertical pipes is at the bottom. The sky is a uniform, clear blue.

CRANE SYSTEM

Ergon Technologies has a full crew for rig inspection and remediation providing Engineering support, supervision and field technicians.

Our Field Engineers have extensive experience with all types of cranes and we can supply OEM parts and service the full range of cranes.

Ergon is also an accredited organization for training and certifying crane inspectors.

SAFETY SERVICES

Rope Access Services

Certified IRATA rope-access teams perform inspection, maintenance, repairs, and installation works in hard-to-reach areas with maximum safety and efficiency.

DROPS

Our DROPS (Dropped Objects Prevention System) inspections and mitigation programs identify hazards, secure equipment, and implement preventive measures to eliminate dropped-object incidents and ensure safer rig operations.

NDT SERVICES

Our Non-Destructive Testing (NDT) services assess asset integrity and safety without operational disruption, using conventional methods such as UT, MT, VT, PT, ECT, Hull Gauging, Hardness, PMI, and IRIS.

We also provide advanced NDT techniques including PAUT, TOFD, and MFL for accurate flaw detection and condition assessment to international standards.

Our NDT services support integrity management of offshore platforms, rigs, pipelines, and critical equipment, enhancing safety, reducing downtime, and extending asset life.

MANUFACTURING EXCELLENCE IN OFFSHORE RIG SPARES

Comprehensive Rig Compatibility – We manufacture high-quality spares for all major offshore rig designs, including MLT, Keppel, F&G, with special expertise in BMC rigs.

All-Round Component Coverage – Our facility produces precision engineered spares for cranes, jacking systems, skidding systems, and drilling equipment, ensuring seamless offshore operations.

State-of-the-Art Facility & Expertise – Located in Hamriyah Free Zone, Sharjah, our manufacturing unit is equipped with high-end machinery and an in-house team of specialists, which has delivered over 200 orders, with superior quality and reliability.

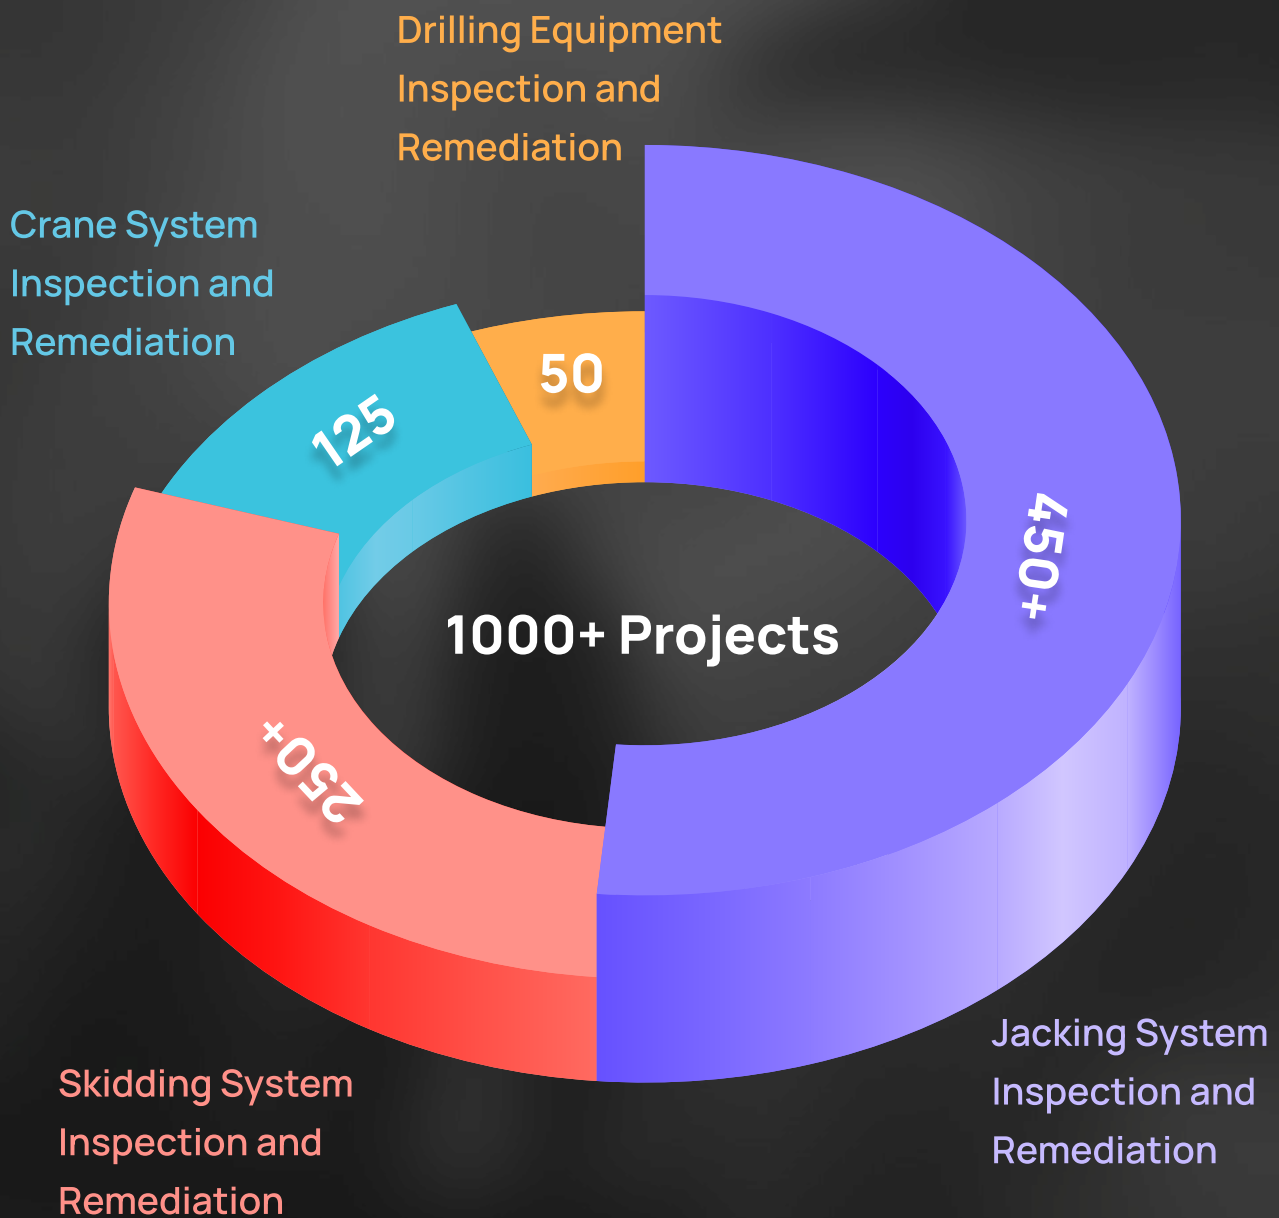

FABRICATION & MANUFACTURING CAPABILITIES

Scope: Refineries, Platforms, Pipelines, Vessels, Modular Units

Equipment: CNC Machining, Plasma Cutting, MIG/TIG/SMAW Welding, Blasting & Painting

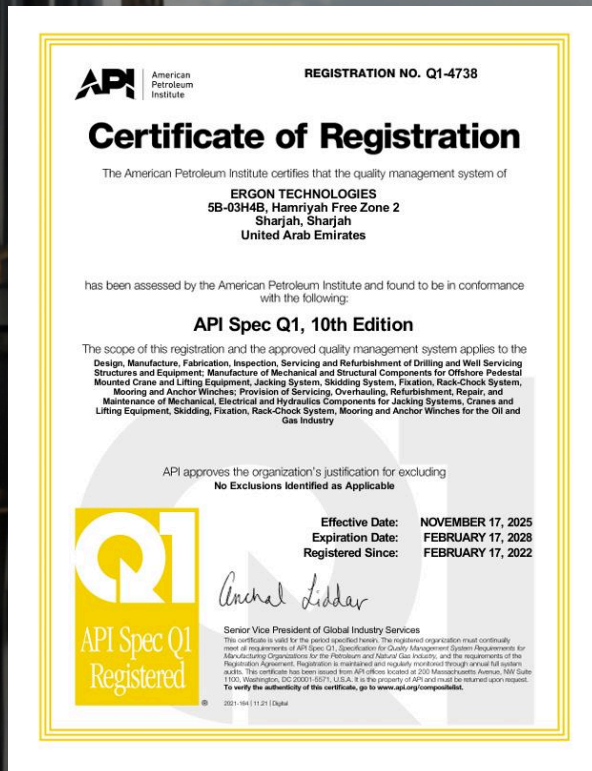

Key Facilities: Welding Bays, Hydro Testing, In House QA/QC

ISO CERTIFICATIONS

ABS Quality Evaluations
Certificate Of Conformance
 This is to certify that the Quality Management System of:
ERGON TECHNOLOGIES DMCC
 Unit No: 805, JBC1,
 Plot No: JLT-PH1-G2A ,
 Jumeirah Lakes Towers, Dubai 340505
 United Arab Emirates

has been assessed by ABS Quality Evaluations, Inc. and found to be in conformance with the requirements set forth by:
ISO 9001:2015

The Quality Management System is applicable to:
 MANAGEMENT OF MAINTENANCE & ASSET INTEGRITY PROJECTS TO OIL AND GAS INDUSTRY INCLUDING JACKING & SKIDDING SYSTEM, DRILLING EQUIPMENT, CRANES, LIFTING GEAR AND TRADING OF RELATED SPARE PARTS

This certificate may be found on the ABS QE Website (www.abs-qe.com). For certificates issued in the People's Republic of China information may also be verified on the CNCA website (www.cnca.gov.cn).

Certificate No: 60433
 Certification Date: 15 February 2020
 Effective Date: 02 February 2023
 Expiration Date: 14 February 2026
 Revision Date: 13 February 2023

 Dominic Townsend, President

Validity of this certificate is based on the successful completion of the periodic surveillance audits of the management system defined by the above scope and is contingent upon prompt, written notification to ABS Quality Evaluations, Inc. of significant changes to the management system or components thereof.
